So much more than just a good pair of gumboots

There is so much more to a good pair of gumboots than quality alone – but you're only going to notice that if something goes wrong. It's why we focus on those aspects you don't see, but truly value as a customer.

Do you have time to be let down?

Of course you don't. Time is one commodity the working world is always short on. According to a survey done on working professionals in five countries, South Africans spend the most time at the office, with an average of 9.5 hour work days. That's a 47.5 hour work week. With statistics like that it's not surprising that as many as 88% of employees have a hard time juggling work and play. As a result, it's not uncommon to experience chronic fatigue and exhaustion in today's working culture.

With this in mind, Wayne understands that their customers need a company they can trust and rely on. A quality product alone is no longer good enough, it's the entire customer experience, from start to finish that really matters.

Wayne is dedicated to establishing strong relationships with their customers through an understanding of their individual needs, adopting a flexible approach and degree of personal contact. They've improved the areas of their business that are important to you, even the aspects you don't think about. It's these aspects that are often unnoticed, until something goes wrong.

Furthermore, Wayne have made selecting gumboots simpler than ever with a new user-friendly catalogue and website. With Wayne you get so much more than just a good pair of gumboots. Rest assured, they've taken care of almost everything, allowing you to concentrate on what you do best.

Wayne, your symbol of confidence.

THE DIFFERENCE BETWEEN **PVC** AND **PU** BOOTS

PVC gumboots are a popular choice because they are economical, dependable and provide protection against a wide range of acids, oils and chemicals. However, Wayne's range of premium Polyurethane (PU) gumboots are fast becoming a contender within the market place - and with good reason.

Their range of PU gumboots can last up to 3 times longer than PVC boots, they are lighter in weight, thereby enhancing the comfort to the wearer.

Whilst the benefits of PVC gumboots are clear in many cases, PU gumboots do provide greater resistance to the harsher acids, oils and chemicals that are present in some industrial environments.

It is therefore recommended that customers consult the chemical resistance table provided at the back of this catalogue before making a final purchasing decision.

Poron Pad Insole

Fitted as standard in Metaguard boots.

Sizes: RSA 5 -12

Polyurethane Comfort Insole

Fitted as standard in all Polyurethane boots.

Sizes: RSA 4 -14

Energiser Woollen Insole

The Energiser Woollen Insole is made from highly absorbent wool and treated with an Ultra-Fresh DM-25-WP process. This has the advantage of fighting fungal and bacterial infections while minimising conditions such as Athlete's Foot.

Sizes: RSA 5 -12

Boot Fur Liner

For added comfort and warmth in cold environments.

If you are exposed to any of the acids, oils or chemicals that rate 1, 2 or 3 on the table we recommend a PVC gumboot.

The above table should be used as a general guide only. Performance in the actual working environment will depend upon the following: temperature of chemicals, concentrations of chemicals and duration of exposure.
